

DIXIT JAYSWAL

Sr. Full Stack Developer ,Cloud & Microservices | djayswal023@gmail.com | Vadodara, India | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY Detail-oriented Full Stack Developer specializing in React.js, Vue.js, Node.js, and TypeScript with expertise in real-time data streaming, cloud deployment, and containerized microservices. Proven ability to design and implement scalable analytics, monitoring, and alerting systems using Apache Kafka, Apache Pinot, AWS, and Docker. Adept at cross-functional collaboration and delivering measurable performance improvements for enterprise clients.

TECHNICAL SKILLS

- **Languages:** C, C++, Java, Python, TypeScript
 - **Frontend:** React.js, Vue.js
 - **Backend:** Node.js (Express), REST APIs, WebSocket, Supabase
 - **Data & Streaming:** Apache Kafka, Apache Pinot
 - **Databases:** PostgreSQL, MySQL (Data Modelling, Query Optimization)
 - **Cloud & DevOps:** AWS (EC2, S3, SES, Lambda, ECR), Docker, Snowflake, Azure Event Hub
 - **Architecture & Workflows:** Microservices Architecture, Real-time Analytics, Agentic AI Workflows, Cross-functional Team Leadership
-

PROFESSIONAL EXPERIENCE

Thinkbiz Technology Pvt Ltd – Ahmedabad, India *Sr. Full Stack Developer* | Dec 2023 - Present

J-VIS (Jera Vision Intelligence System for Integrated Operation)

- Played a pivotal role in the Detailed System Design (DSD) for an enterprise anomaly detection platform for power plants, seamlessly integrating external AI/ML image analysis models with core operational workflows.
- Engineered a highly scalable, event-driven data ingestion pipeline (AWS SQS → Lambda → DynamoDB) to asynchronously process, map relational IDs, and persist complex image analysis results.

- Architected the end-to-end alarm lifecycle and subsequence flow, handling automated alarm generation, state resets, and an integrated reporting workflow to track operational remediation tasks.
- Developed a dynamic, Lambda-driven notification engine delivering customized in-app and email alerts based on granular user preferences, secured by strict Role-Based Access Control (RBAC).
- Implemented critical cross-platform integrations, including fetching master data from Snowflake via Lambda and deploying an Amazon EKS pod to synchronize user directories directly from Azure Active Directory.

Jugaad - Report & Analytics Platform

- Architected a dynamic analytics platform with React, Node.js, Apache Kafka & Apache Pinot, enabling customizable, real-time reports with sub-second response times.
- Built low-latency data pipelines handling millions of events/day, reducing ad-hoc reporting cycles by 80%.
- Developed drag-and-drop UI and REST APIs for report creation, filtering, and export.

Uptime Monitoring System

- Designed a real-time monitoring dashboard for cloud resources using Vue.js, Node.js, and WebSocket.
- Implemented a multi-channel alert system (automated calls, SMS, email, Azure ticketing) reducing MTTR by 50%.
- Created incident-tracking modules with root-cause analysis for outages.

JERA Power Plant Stoppage Management System (Japan)

- Integrated Azure Event Hub to process telemetry data and detect anomalies in near-real time.
- Customized UI workflows based on operator feedback, improving usability for Japanese clients.

INDEPENDENT PROJECTS & OPEN SOURCE CONTRIBUTIONS

ContentHQ (Social Media Asset Management)

- Initiated and developed an autonomous system for managing digital assets, utilizing AWS S3 presigned URLs and AI-driven content organization to streamline workflows for creators.

SaaS Quality Assurance

- Contributed to open-source repository stability by engineering and implementing comprehensive Snapshot test cases for complex user interfaces, including critical tax-setting pages.

EDUCATION B.Tech, Computer Science & Engineering Charotar University of Science and Technology (CHARUSAT) | 2020 - 2024 | CGPA: 8.80
